New product from Tracksa!

Multifunctional SC board makes the light system complete!

Tracksa following up our philosophy of making new innovative safety products for motorsport. After years with developing, testing and running operations on more than 30 circuit, we have develop the most complete light system in the world. This is done together with the drivers, the track owners the marshal's and the car sport association in several countries. This close cooperation's has made it possible for us to develop the best and most user friendly safety system in the marked. Our system is now the only light system in the world that can show all the flags that you use on the race circuit.

Our multi functional SafetyCar board is a additional product that we can deliver together with the Light panel. It fulfil the users wishes regarding some of the flag/signals that until now, not have been possible to show. This including the SC in letter, white, slippery and additional RED on each flag post. The technology that we use makes it also possible to develop new solutions in the future.

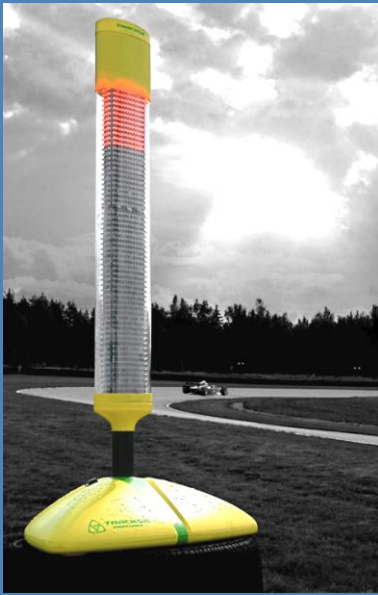

With this last product, we are proud to say that Tracksa is the only supplier in the world that has the solutions and technology to completely move the flag marshal's away from the dangerous area and into safer spots. Beside of making the sport safer, the system makes it a lot easier to run your daily operations, more cost efficient and with less people.

This also makes it possible to take away protections that are made for the flag marshal's and make the circuit safer for the drivers with less barriers to crash in.

See our complete range of wireless light products on the next side, and please contact us if you need more information.
